

In 1–3, use the multiplication equation to help find each quotient.

1. $54 \div 9 = ?$

$9 \times \underline{\quad} = 54$

So, $54 \div 9 = \underline{\quad}$.

2. $24 \div 8 = ?$

$8 \times \underline{\quad} = 24$

So, $24 \div 8 = \underline{\quad}$.

3. $56 \div 8 = ?$

$8 \times \underline{\quad} = 56$

So, $56 \div 8 = \underline{\quad}$.

In 4–12, find each quotient.

4. $36 \div 9 = \underline{\quad}$

5. $63 \div 9 = \underline{\quad}$

6. $80 \div 8 = \underline{\quad}$

7. $9 \overline{)72}$

8. $8 \overline{)48}$

9. $9 \overline{)81}$

10. $8 \overline{)8}$

11. $9 \overline{)90}$

12. $9 \overline{)27}$
