

Practice 17

Reminder

The area of a square is computed by multiplying the length of one side times itself.

$$A = s \times s \text{ or } A = s^2 \text{ (Area = side squared)}$$

Directions: Compute the area of each square.

1.

8 ft

2.

20 ft.

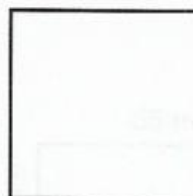

3.

15 m

4.

25 cm

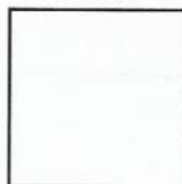

5.

18 yards

6.

11 cm

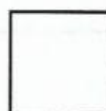

7.

62 ft.

8.

11 miles

9.

2.2 m

10.

$\frac{1}{2}$ ft.
