Geologic Time

Era	When was it?	Types of species that appeared
Cenozoic	65 million years ago	Humans, larger mammals
Mesozoic	248-65 million years ago	Small mammals, birds, dinosaurs, angiosperms
Paleozoic	544-248 million years ago	Early reptiles, amphibians, fish, gymnosperms
Precambrian	4.5 billion years to 545 million years ago	Worms, Jellyfish

1. According to the table, a fossil of a dinosaur would probably be	from the	
---	----------	--

- a. Cenozoic Era
- b. Mesozoic Era
- c. Paleozoic Era
- d. Precambrian Era
- According to the table, which geologic period occurred more than 800 million years ago?
- a. Cenozoic Era
- b. Mesozoic Era
- c. Paleozoic Era
- d. Precambrian Era
- 3. According to the table, early ancestors of frogs would have appeared during the
- a. Cenozoic Era
- b. Mesozoic Era
- c. Paleozoic Era
- d. Precambrian Era
