

Arthropods

Their bodies have three parts: head, thorax and abdomen. Some arthropods have wings, some don't. Some have an external skeleton (exoskeleton), some don't.

INSECTS
(six legs)

SPIDERS
(eight legs)

abdomen head thorax

INVERTEBRATES

Animals that don't have an internal skeleton.

Molluscs

They have a soft, muscular body.

Worms

They have a long, soft body.
