Los Logaritmos

Definición de logaritmo en base a de P

$$\log_a P = b \Leftrightarrow a^b = P$$

Resuelve aplicando la definición:

$\log_2 64 = x \Leftrightarrow$ $\square^{\square} = \square$

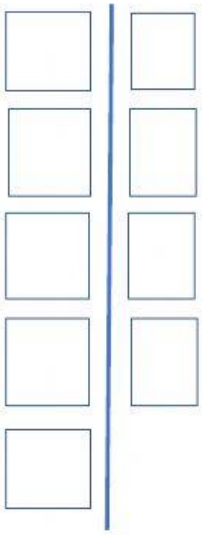

$\square = \square^{\square}$

$\log_2 x = 4 \Leftrightarrow \square^{\square} = \square \Rightarrow \square = \square$

Resuelve aplicando la definición:

$\log_x 625 = 4 \Leftrightarrow \square^{\square} = \square$

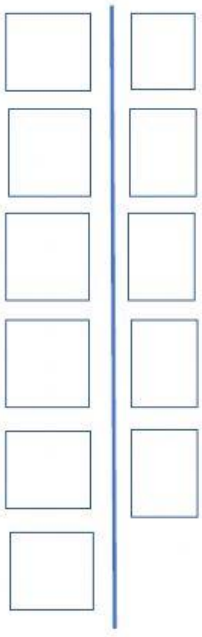

$\square^{\square} = \square^{\square}$

$\square = \square$

$\square = \square^{\square}$

$\log_3 243 = x \Leftrightarrow \square^{\square} = \square$

$\square^{\square} = \square^{\square}$

$\square = \square$

$\square = \square^{\square}$
