Did you know that the first zoos were a form of entertainment for kings? Some of them are very old. The first zoo was in China in 1400.

In Europe, many zoos opened in the nineteenth century. London Zoo opened in 1826. Soon there were lots of animals. It had the first collection of reptiles, the first aquarium, and the first insect house. Londoners liked going to see the animals, especially big animals like pandas and gorillas. One gorilla, called Guy, was very famous. Today you can see a statue of him in the zoo.

But many people don't like zoos. They think it is wrong for animals to be in cages. But zoos are changing. They look after animals more carefully now. In many zoos animals are not in cages. They have more space to move about freely. And perhaps the zoos are helping to save some animals from dying out.
