

Ebin and Farah are talking about the causes and effects of air pollution. Read what they are saying and complete the chart given below.

Farah, I found out that open burning of rubbish causes air pollution. When we do this, poisonous gases will be released into the air. When we breathe in this polluted air, we may find it difficult to breathe.

Yes, Ebin. Another cause of air pollution is the fumes from vehicles. People can fall sick when they breathe in this polluted air.

Open-burning

Air Pollution

People can fall sick

Now, read what Farah says about the causes and effects of water pollution. Draw a multi-flow map about water pollution.

Water pollution happens when factories dump chemicals and toxic wastes into rivers. Animals that live in these polluted rivers will die.

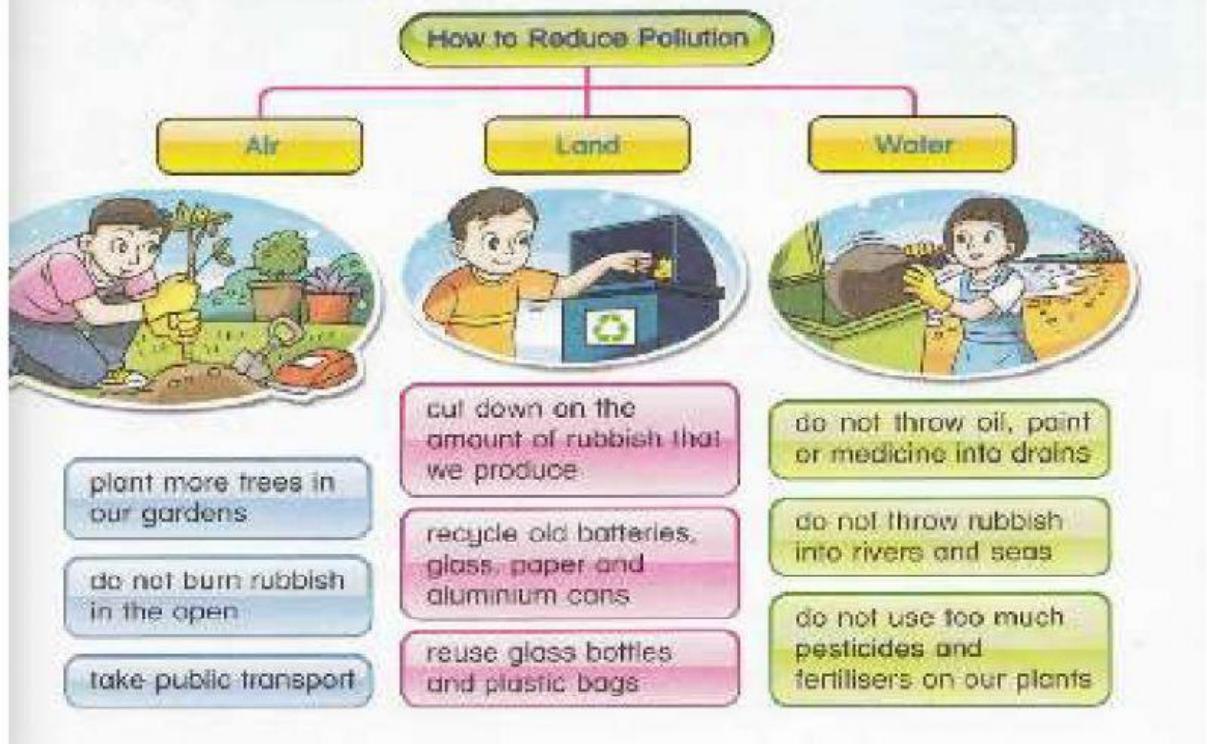

People pollute rivers and seas by throwing rubbish into them. Many sea creatures get killed when they eat the rubbish.

Air Pollution

People can fall sick

Let's work together to reduce air, land and water pollution. Look at the chart and find out what we can do.

To reduce air pollution, we should plant more trees in our gardens.

We should not \_\_\_\_\_.

We should \_\_\_\_\_.

To reduce water pollution, we should not \_\_\_\_\_.

We also should not \_\_\_\_\_.

Besides that, we should not \_\_\_\_\_.

To reduce land pollution, we should \_\_\_\_\_.

We should \_\_\_\_\_.

Other than that, we should \_\_\_\_\_.
