

ÁREA DEL TRIÁNGULO

Hallar el área de los siguientes triángulos.

a)

$$A = \frac{\boxed{} \times \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}} = \boxed{} \text{ cm}^2$$

b)

$$A = \frac{\boxed{} \times \boxed{}}{\boxed{}} = \frac{\boxed{}}{\boxed{}} = \boxed{} \text{ cm}^2$$

c)

$$A = \frac{\square \times \square}{\square} = \frac{\square}{\square} = \square \text{ cm}^2$$

d)

$$A = \frac{\square \times \square}{\square} = \frac{\square}{\square} = \square \text{ cm}^2$$

e)

$$A = \frac{\square \times \square}{\square} = \frac{\square}{\square} = \square \text{ cm}^2$$

f)

$$A = \frac{\square \times \square}{\square} = \frac{\square}{\square} = \square \text{ cm}^2$$

g)

$$A = \frac{\square \times \square}{\square} = \frac{\square}{\square} = \square \text{ cm}^2$$

h)

$$A = \frac{\square \times \square}{\square} = \frac{\square}{\square} = \square \text{ cm}^2$$

i)

20 cm

5 cm

$$A = \frac{\square \times \square}{\square} = \frac{\square}{\square} = \square \text{ cm}^2$$

j)

12 cm

4 cm

$$A = \frac{\square \times \square}{\square} = \frac{\square}{\square} = \square \text{ cm}^2$$
