

Name: _____

Paragraphs

Match the numbers with the sentences in the paragraph.

1. Topic sentence
2. First point
3. First detail
4. Second point
5. Second detail
6. Third point
7. Third detail
8. Conclusion

Studying English

Learning online is not the best way to study English. Learning online does not allow you to practice your speaking as much. For example, during coffee break you are not with your classmates to practice speaking. Asking questions while learning online takes more time and is more difficult. The student must call or type a message and then share their screens to see the problem. Studying with a computer is not as much fun as with people. When you learn in the classroom you can do many different activities, but online there are not as many different things to do. Learning in the classroom is better than studying English online.
