while-reading

Read the passage carefully.

Marigold, is derived from Mary's gold, a name first applied to a similar plant native to Europe. Marigolds have in size from 0.1 to 2.2 m tall and have green leaves. There are golden, orange, yellow, white, and maroon.

Marigolds are a favorite of butterflies, bees, ladybugs, and other insects. Give them full sun and some well-draining soil and watch them bloom.

In Chiang Rai, Rai Ruen Rom Organic Farm is the beautiful farm to see the Marigold. It located in Thoeng District and take an hour from the town. Tourists always visit here in the winter season.
