

I. DRAG AND DROP. Fill in the blanks with the correct word.

It was December of 1895 when the Lumiere brothers in Paris projected the first movie to a paying audience. People were and thought magic was behind this. However, by 1932 there were cinemas everywhere, and they were the most popular way of spending one's time back then. Millions would visit cinemas every week.

Around the same period, Philo Farnsworth was working hard on developing the first television. Since he was a little boy, Philo loved to with mechanical objects. He was curious, and the of his time his mind constantly. In the mornings, he science magazines, and at night he dreamt and to invent something that would bring happiness and peace to the world. In September 1928, his dream came true.

Moving on to the 80s, a German inventor, Chuck Hull, created the first 3D printer. This machine can almost any object if you have got the, of course. The medical field has been especially benefited, as scientists have been able to "print" body parts like prosthetics or arteries that could change or save millions of lives. Successful have been done with animals, so probably humans will go next.

II. Select the word that correctly completes each sentence.

1. The magician escaped through the on the stage, but nobody saw.
