City Profiles

This week we look at commuters around the world . . .

Dan Rodgers works for San Francisco's BART, the Bay Area Rapid Transit rail system that connects the outlying suburbs and towns with the city. But Dan doesn't catch a train to work. He rides a bicycle to work from his apartment in the city. Cycling is popular in San Francisco because distances are not that great. Cycling is also very good exercise. Dan likes cycling to work, but sometimes the steep hills tire him out.

Fatima da Costa lives in Patriarca, a suburb in the east of São Paulo, Brazil. She works in the center of the city, near Praça Republica. Every day Fatima takes the subway to work in the morning and back home in the evening. She thinks traveling on the São Paulo subway system—the Metro—is quick and convenient. But the trains are very crowded during rush hour, and she often can't find a seat.
