4TH GRADE- UNIT TWO / READING

Read the text and identify the main idea and details.

An average beehive consists of about 20,000 bees. Within the colony, there are three types of bees each with its own important job. There is only one queen bee in the hive, and her only job is to fill the hive with eggs. A queen will lay about 1,500 eggs a day. Male bees are called drones. Their only job is to mate with the queen. Worker bees, on the other hand, are extremely busy. They are female bees that lay no eggs. Worker bees tend the hive by taking care of the babies, building honeycombs and keeping the hive cool. Some worker bees also leave the hive to go collect nectar and pollen.

4TH GRADE- UNIT TWO / READING

Read the following Friendly Letter and drag the parts of the letter

body

date

introduction

final paragraph

greeting

August 20th, 2019.

Dear Amy,

It was a surprise to receive your letter. I'm sorry for not writing you back before, but I am a little busy organizing for my trip. As you know, I've always wanted to visit some unusual places.

You would never guess where I am planning to go. I'm going to Antarctica! That place is amazing, and I am very excited about it!

The people I'm traveling with are incredible. They know every way in the snow, and they are very helpful. However, it is so cold and everything I do is very challenging, even preparing food.

Tomorrow we plan to move north and if we are lucky, we'll see some penguins. I'd like to meet you soon, and when I come back show you some pictures.

Love,
Lucy.
