## **States Of Matter**

**Directions:** Fill in the text boxes with the different words that are either a solid, liquid or gas.

---

**Solid:** A firm and stable in shape; not a liquid.

**Liquid:** A substance that flows freely, but is of constant volume, having the consistency of water or oil.

**Gas:** are air-like substances that can move around freely or they might flow to fit a container. They don't have a shape either. ... If they get out a container they spread very easily.
