SYSTEMS**

ORGANISMS

- An organ system is a group of organs with related functions.
- They work together to perform body functions.
- Organs are made up by the union of several tissues that are organized and work together.
- A living thing: human beings, animals, plants.
- Living things can carry out the vital functions.
- Tissues are groups of similar cells.
- They work together and perform a function.
- All living things are made up of cells.
- Cells are the smallest parts and the basic building blocks of all living things.
