

Internal View of the Brain  
This worksheet is worth 10 points

Part I: Label				
Left frontal lobe	Left Parietal Lobe	Left occipital lobe	Cerebellum	Corpus callosum
Thalamus	Hypothalamus	Pituitary gland	Brain stem	

Part II: Matching: Functions and lobes

- |                         |  |
|-------------------------|--|
| 1. ____ Frontal Lobe    | A. known as the relay center                             |
| 2. ____ Parietal Lobe   | B. responsible for higher level cognitive thought        |
| 3. ____ Occipital Lobe  | C. responsible for communicating between the hemispheres |
| 4. ____ Cerebellum      | D. called the master gland                               |
| 5. ____ Corpus Callosum | E. responsible for breathing, heart beat                 |
| 6. ____ Thalamus        | F. responsible for homeostasis and hormones              |
| 7. ____ Hypothalamus    | G. responsible for processing sensory input              |
| 8. ____ Pituitary Gland | H. responsible for balance and coordination              |
| 9. ____ Brain stem      | I. responsible for visual processing                     |

Part III: Multiple Choice: Use the scenario to answer the questions.

1. \_\_\_\_ Your patient sees an object in the left visual field and they can't come up with name. Which structure is likely damaged?

- A. Corpus Callosum
- B. Thalamus
- C. Hypothalamus
- D. Pituitary Gland

2. \_\_\_\_ Despite having average height parents, your patient is short in stature. What structure should be checked for damage?

- A. Corpus Callosum
- B. Thalamus
- C. Hypothalamus
- D. Pituitary Gland

3. \_\_\_\_ There is no damage to any part of the cerebrum, however your patient is having symptoms of cerebral damage. Which structure should be checked for damage?

- A. Corpus Callosum
- B. Thalamus
- C. Hypothalamus
- D. Pituitary Gland

4. \_\_\_\_ Your patient is struggling to stay asleep and is unable to concentrate at work/school because they are so tired during the day. What structure should be checked for damage?

- A. Corpus Callosum
- B. Thalamus
- C. Hypothalamus
- D. Pituitary Gland
