

The image displays two 10x10 grids, each with a vertical axis labeled 1 to 9 (representing rows) and a horizontal axis labeled 1 to 10 (representing columns). The grids illustrate the distribution of red and green squares for two different scenarios.

Left Grid:

- Red Squares:** A large block of red squares occupies the top-left corner, spanning rows 1 to 9 and columns 1 to 4. Additionally, there are red squares at (row, column) coordinates: (6, 5), (6, 6), (6, 7), (6, 8), (7, 5), (7, 6), (7, 7), (7, 8), (8, 5), (8, 6), (8, 7), (8, 8), (9, 5), (9, 6), (9, 7), (9, 8), and (9, 9).
- Green Squares:** A horizontal row of green squares is located at row 10, spanning columns 1 to 10. Additionally, there are green squares at (row, column) coordinates: (2, 2), (2, 4), (2, 6), (2, 8), (3, 3), (3, 4), (3, 5), (3, 6), (4, 3), (4, 4), (4, 5), (4, 6), (5, 3), (5, 4), (5, 5), (5, 6), (6, 3), (6, 4), (6, 5), (6, 6), (7, 3), (7, 4), (7, 5), (7, 6), (8, 3), (8, 4), (8, 5), (8, 6), (9, 3), (9, 4), (9, 5), (9, 6), and (9, 7).

Right Grid:

- Red Squares:** A large block of red squares occupies the top-left corner, spanning rows 1 to 9 and columns 1 to 4. Additionally, there are red squares at (row, column) coordinates: (6, 5), (6, 6), (6, 7), (6, 8), (7, 5), (7, 6), (7, 7), (7, 8), (8, 5), (8, 6), (8, 7), (8, 8), (9, 5), (9, 6), (9, 7), (9, 8), and (9, 9).
- Green Squares:** A horizontal row of green squares is located at row 10, spanning columns 1 to 10. Additionally, there are green squares at (row, column) coordinates: (2, 2), (2, 4), (2, 6), (2, 8), (3, 3), (3, 4), (3, 5), (3, 6), (4, 3), (4, 4), (4, 5), (4, 6), (5, 3), (5, 4), (5, 5), (5, 6), (6, 3), (6, 4), (6, 5), (6, 6), (7, 3), (7, 4), (7, 5), (7, 6), (8, 3), (8, 4), (8, 5), (8, 6), (9, 3), (9, 4), (9, 5), (9, 6), and (9, 7).
