

1. Пресметни.

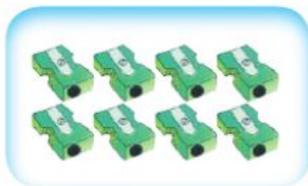

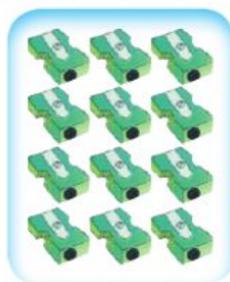

$$2 \cdot 4 = 4 + 4 = \square$$

$$4 \cdot 2 = 2 + 2 + 2 + 2 = \square$$

$$3 \cdot 5 = 5 + 5 + 5 = \square$$

$$5 \cdot 3 = 3 + 3 + 3 + 3 + 3 = \square$$

2. Свържи групите с равен брой предмети.

3. Открий грешките и ги поправи.

$$3 + 3 + 3 + 4 = 4 \cdot 3$$

$$3 + 3 + 3 + 4 = (3 \cdot 3) + 4$$

$$7 + 7 + 7 + 7 + 7 = 4 \cdot 7$$

$$5 + 6 + 6 + 6 + 6 = 4 \cdot 6$$

4. Запиши произведенията като сбор на равни събираеми и ги пресметни.

$$3 \cdot 3 = 3 + 3 + 3 = \square$$

$$4 \cdot 6 = \underline{\hspace{2cm}} = \square$$

$$8 \cdot 5 = \underline{\hspace{2cm}} = \square$$

$$3 \cdot 7 = \underline{\hspace{2cm}} = \square$$

$$7 \cdot 3 = \underline{\hspace{2cm}} = \square$$

$$6 \cdot 6 = \underline{\hspace{2cm}} = \square$$
