

LINEAR EQUATIONS / PERSAMAAN LINEAR

WRITE THE CORRECT ANSWER (SHOW YOUR WORKING)

TULISKAN JAWAPAN YANG BETUL (TUNJUKAN LANGKAH KERJA)

1. $7h + 5 = 3h - 13$

2. $3(q - 2) + 10 = 13$

3. $\frac{2x - 8}{5} = 4$

4. $\frac{3(m + 11)}{5} = 8$

Answer options / pilihan jawapan :

$$7h - 3h = -13 - 5$$

$$2x - 8 = 4 \times 5$$

$$h = -4\frac{1}{2}$$

$$3m + 33 = 8 \times 5$$

$$x = \frac{28}{2}$$

$$4h = -18$$

$$3q - 6 = 13 - 10$$

$$q = 3 + 6$$

$$3m = 40 - 33$$

$$m = \frac{7}{3}$$

$$h = \frac{-18}{4}$$

$$q = 9$$

$$m = 2\frac{1}{3}$$

$$x = 14$$

$$2x = 20 + 8$$
