

Choose the factors of the given numbers:

19	11	10	4	3	55	6
12	1	4	1	20	12	1
6	15	8	2	5	1	2

19 =

20 =

24 =

55 =

Complete the table of factors and multiples:

Number	Factors	First three multiples
15		
6		
18		
20		
25		
11		

Match the following:

1,2,4,8,16

uncountable multiples

24,48,96

100

Eighth multiple of 6 is

Smaller than or equal to

Factors of 30 are

First three multiples of 24

First five multiples of 8

Factors of 16

All the factors of a number are

48

Any number will have

1,2,3,5,10,15,30

10<sup>th</sup> multiple of 10 is

8,16,24,32,40

Fill in the blanks:

- The fifth multiple of 9 is \_\_\_\_\_.
- The factors of any number divides the number exactly. True/False?\_\_\_\_\_.
- A multiple of any number is divisible by the number. T/F \_\_\_\_\_.
- A number has \_\_\_\_\_ factors.
