

How many?

There are 3 groups.

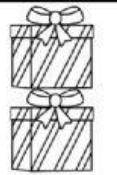

There are 2 in each group.

You can add.

$$\mathbf{2 + 2 + 2 = 6}$$

You can multiply.

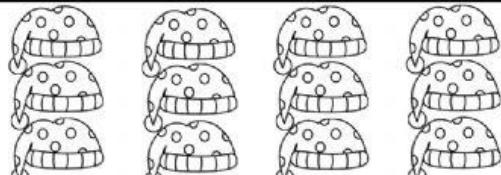

$$\begin{aligned}3 \text{ twos} &= 6 \\3 \text{ groups of } 2 &= 6 \\3 \times 2 &= 6\end{aligned}$$

Add it: _____

$$4 \text{ twos} = \underline{\quad}$$

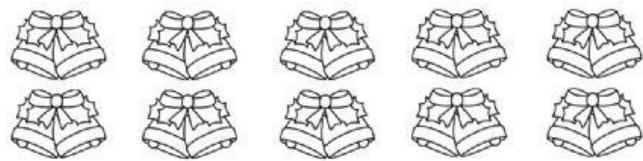

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

Add it: _____

$$\underline{\quad} \text{ groups of } \underline{\quad}$$

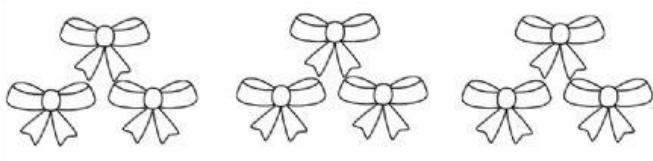

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

Add it: _____

$$5 \text{ twos} = \underline{\quad}$$

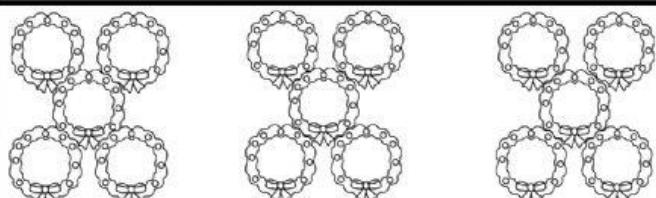

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

Add it: _____

$$\underline{\quad} \text{ groups of } \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

Add it: _____

$$\underline{\quad} \text{ groups of } \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

Add it: _____

$$2 \text{ threes} = \underline{\quad}$$

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$
