

1. Photosynthesis crossword, Read the clues and complete the gaps**Across**

3. The source of energy for photosynthesis.
5. Plant organ used to take water to the leaves and to support the leaves.
6. Process that plants use to make their own food.
8. Plant organ used to make food by photosynthesis.
10. Green disc containing chlorophyll, found in plant cells.

**Down**

1. Green substance found inside chloroplasts.
2. Plant organ used to take water out of the soil.
4. Tough wall around plant cells. Helps to support the cell.
7. The 'control centre' of a cell.
9. To take in, for example when water passes from the soil into a root.

## II. COMPLETE THE GAPS, CHOOSE TRUE or FALSE

Now see if you can answer these questions with TRUE or FALSE.

1. Plants get food from the soil. \_\_\_\_\_
2. Plants make food in their green leaves. \_\_\_\_\_
3. Water gives the plant the food it needs. \_\_\_\_\_
4. It is the green chemical in leaves that helps make the food.  
\_\_\_\_\_
5. To make food a plant needs oxygen. \_\_\_\_\_
6. Chlorophyll is green. \_\_\_\_\_
7. Photosynthesis makes chlorophyll. \_\_\_\_\_
8. Photosynthesis is when the plants makes food in its leaves.  
\_\_\_\_\_
9. A plant needs water to make food. \_\_\_\_\_
- 10 The plant gets food from the sun. \_\_\_\_\_
- 11 Sunlight is needed for photosynthesis. \_\_\_\_\_
- 12 The speed of photosynthesis is always the same in a leaf.  
\_\_\_\_\_
- 13 The speed of photosynthesis depends on the temperature.  
\_\_\_\_\_
- 14 It needs to be warm for photosynthesis to take place quickly.  
\_\_\_\_\_

## III. CHOOSE THE BEST OPTION TO COMPLETE THE PICTURE.

**IV. Draw lines to match the sentence beginnings with their correct endings.**

Plants need water from the soil for ...

The roots of a plant are spread out to ...

Leaves have a large surface area to ...

If a plant does not get enough water ...

Photosynthesis happens in ...

Carbon dioxide gets into leaves ...

Roots, stems and leaves are all ...

... it wilts.

... absorb lots of light.

... photosynthesis.

... through stomata.

... plant organs.

... chloroplasts.

... absorb lots of water.

**V. COMPLETE THE GAPS, USE THE WORD BANK.**

The raw materials for photosynthesis are \_\_\_\_\_ and \_\_\_\_\_.

The sugar made by photosynthesis is \_\_\_\_\_.

\_\_\_\_\_ gas is also produced. Photosynthesis needs \_\_\_\_\_ energy to make it happen.
