air nibbler band saw circular saw compressor die grinder
 drill press plasma cutter riveting machine
 sheet metal bending machine

Now match the machines with their description

Air nibbler	It is used for quick cuts when accuracy is not an issue.
Band saw	It compresses air or any gases from a low pressure to a pressure level.
Circular saw	It cuts through electrically conductive materials by means of an accelerated jet of hot plasma. It is used for high speed and precision cuts.
Compressor	It is used for woodworking, metalworking or for cutting a variety of other materials.
Die grinder	It is used to drill a single hole in a straight and accurate manner.
Drill press	It is a handheld power tool used for grinding, sanding or polishing.
Plasma cutter	It is used to bend sheet metal.
Riveting machine	It is a handheld power tool. It is used to cut metal. It is more precise than shears.
Sheet metal bending machine	It is used to set rivets to join materials together.
