

1) Introduceți întregii în fracție conform desenelor

1)

$$4\frac{5}{6} = \underline{\hspace{2cm}}$$

2)

$$7\frac{3}{7} = \underline{\hspace{2cm}}$$

3)

$$5\frac{5}{8} = \underline{\hspace{2cm}}$$

4)

$$3\frac{1}{2} = \underline{\hspace{2cm}}$$

5)

$$6\frac{2}{3} = \underline{\hspace{2cm}}$$

2) Rezolvați fără desene (folosind proba împărțirii cu rest)

$$5\frac{3}{2} = \quad - \quad , \quad 4\frac{3}{7} = \quad - \quad , \quad 5\frac{3}{5} = \quad - \quad , \quad 4\frac{7}{9} = \quad - \quad , \quad 3\frac{5}{6} = \quad - \quad , \quad 6\frac{1}{8} = \quad - \quad$$
