

**PROJECT  
TIME!**

**Design a 3D online study room plan  
and be an architect for the day!**

### **How to design a room plan**

- Choose the room or area you are going to design and draw a plan, as seen from above.
- Think about the modern technology that you can include and add it to the plan.
- Label the plan where necessary by adding information in call-out boxes.
- Check that your plan is clear and easy to understand.
- Check that your spelling and grammar in the call-out boxes are correct.

### **Plan**

- Draw an outline which shows the shape of your room. Decide if your plan will be digital or on paper.
- Decide what technology is in the room, what it does and where it should go.
- Invent a new technological device to put in your room.
- Include other furniture.

**e-mail it to

Different Colours can affect us in many different ways; that's according to Verity Allen. In her new series 'Colour me Healthy', Verity looks at the ways that colours can influence how hard we work and the choices we make. They can even change our emotions and even influence how healthy we are.

'Have you ever noticed how people always use the same colours for the same things?' says Verity. 'Our toothpaste is always white or blue or maybe red. It's never green. Why not? For some reason we think that blue and white is clean, while we think of green products as being a bit disgusting. It's the same for businesses. We respect a company which writes its name in blue or black, but we don't respect one that uses pink or orange. People who design new products can use these ideas to influence what we buy.'

'During this four-part series, Verity studies eight different colours, two colours in each programme. She meets people who work in all aspects of the colour industry, from people who design food packets, to people who name the colours of lipsticks. Some of the people she meets clearly have very little scientific knowledge to support their ideas, such as the American 'Colour Doctor' who believes that serious diseases can be cured by the use of coloured lights. However, she also interviews real scientists who are studying the effects of green and red lights on mice, with some surprising results.'

Overall, it's an interesting show, and anyone who watches it will probably find out something new. But because Verity is goes out of her way to be polite to everyone she meets on the series, it's up to the viewers to make their own decisions about how much they should believe.

## Who works where?

Klare, Lemon, Morton and Nelson are women who love their work (dress designer, florist, gardener and symphony conductor). From the clues below match up each woman's name with her kind of work.

1. Klare is violently allergic to most plants.
2. Lemon and the florist are roommates.
3. Lemon likes only rock music.
4. the gardener, the dress designer and Nelson are strangers.
