The diagram illustrates the life cycles of two insects. The top row shows the butterfly cycle: a blue box for the adult butterfly, a photograph of a blue and black pupa, a photograph of a black caterpillar, a photograph of green eggs on a leaf, and a blue box for the egg stage. The bottom row shows the grasshopper cycle: a photograph of a brown adult grasshopper, a photograph of a green nymph, a photograph of yellowish-brown eggs, and a green box for the egg stage. Each photograph has a corresponding blank box below it for labeling.
