

Rabbits are small mammals in the family.. They live in groups, and the best known species, the European rabbit, lives in burrows, or rabbit holes, They are herbivores. Rabbits have backbones and thus they are vertebrates.. Fish are vertebrates which live in water and respire (get oxygen) with gills. hey live in freshwater in lakes and rivers, and in salt water in the ocean. Fish swim by exerting force against the surrounding water. Fish can be omnivores, but they can also be herbivores and carnivores.
