

BILINGUAL EDUCATIONAL UNIT "LICEO ALBONOR"

2020-2021

SCIENCE EVALUATION

6TH GRADE

1. Match the words to the pictures.

LAVA

FLOOD

PONDS

ASH

2. Read and complete the statements.

Earth's Moving Plates

Earth's outer crust rests on top of another layer called the mantle. The crust and the top of the mantle are divided into very large pieces called **plates**. The plates move all the time. This movement can cause rapid changes in Earth's surface. Volcanoes and earthquakes often occur along or near places where the plates come together.

The picture shows an area in Iceland where two plates are moving away from each other. Since Iceland is on top of these two plates, it has many volcanoes and earthquakes.

1. The Earth's crust is a layer that rests above the _____.
2. _____ are divisions of the Earth's crust and the top of the mantle.
3. Rapid changes in _____ surface can be caused by the movement of plates.

3. Complete with the words from the box.

Precipitation – Condensation – Evaporation – Collection

1. Water from the oceans, rivers and lakes turns into gas. This is called _____.
2. Gas forms into puffy clouds. This is called _____.
3. The wind blows. The clouds get heavy and cool. Water falls from the clouds. This is called _____.
4. Oceans, rivers and lakes collect the water. This is called _____.

4. Label the water cycle.
