

# Circulatory system

The **circulatory system** is made up of the heart and thousand of tubes called **arteries** and **veins**. The **blood** travels through arteries and veins and **carries oxygen and nutrients to all parts of the body**.

The **heart** is made up of four sections: the left and right **atriums**, and the left and right **ventricles**.

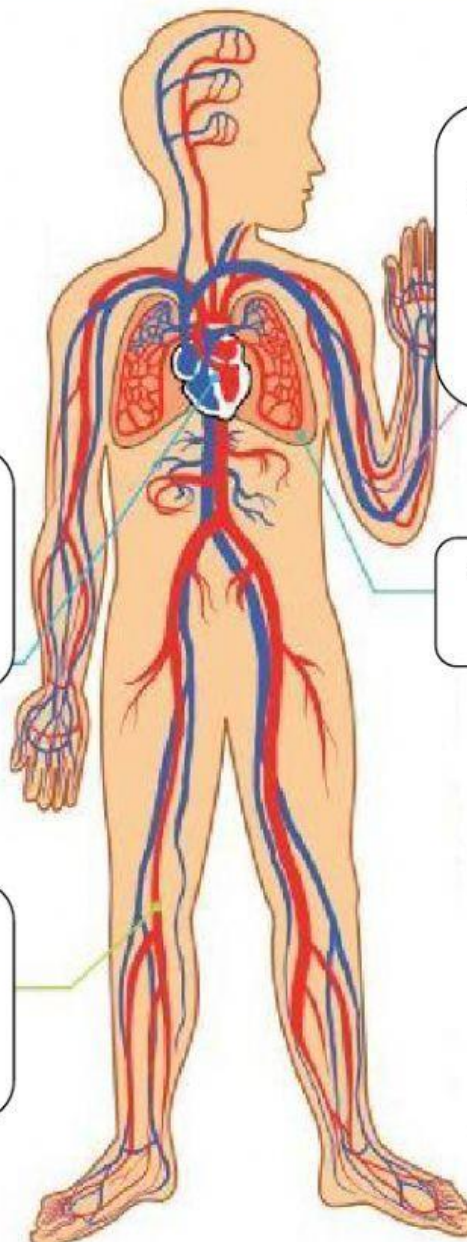

1. Read and label the pictures using the following words.

lungs

heart

veins

arteries

It is a hard working muscle that **pumps blood to every parts of the body**.

They carry **bright red** blood full of **oxygen** from the heart **to all the parts of the body**.

They **return blood to the heart**. This blood is **darker** (usually look **blue**) because they have **low oxygen**.

They **take the oxygen** we need to live.
