

Writing Task: Comparing two places

Lesson 1: Comparing city and country

The city and country are different in many ways.

First, the buildings in the city are higher and more modern than those in the country. More universities and hospitals are located in the city **as well**. There are also more modes of transportation in the city **such as** subways, city buses, and taxis. **Moreover**, the shops and restaurants in the city are much more interesting and more attractive. **Regardless of** the price, you get to buy famous products and eat distinctive food from other countries. **In addition**, job opportunities in the city are much higher because there are more people visiting **as well as** living here. **Lastly**, the country has fresher air and a healthier life style than the city because it is less crowded and less polluted.

I would prefer the country over the city if not for the job opportunities it provides because I think I may live longer and healthier in the country.

I. Choose the correct answer:

1. What is the above text about?
 - a. The population in the city and country
 - b. The size of the city and country
 - c. Comparing city and country
