# IMPROPER FRACTIONS TO MIXED NUMBERS
HOMEWORK GRADE
01/04/2021

Example:

Draw: $\frac{3}{2} =$ $= 1\frac{1}{2}$

(draw a model with 2 parts, shade 3 parts)

Divide: $\frac{3}{2} = 2\overset{1\ R1}{\overline{)3}}$ $\begin{array}{r} \underline{-2} \\ 1 \end{array}$ $= 1\frac{1}{2}$

Select the box with the correct mixed number for each question.

1. Convert $\frac{9}{5}$ to a mixed number.		
$1\frac{4}{5}$	$1\frac{9}{5}$	$\frac{4}{5}$

2. Convert $\frac{11}{3}$ to a mixed number.		
$\frac{8}{3}$	$3\frac{8}{3}$	$3\frac{2}{3}$

3. Convert $\frac{5}{2}$ to a mixed number.		
$2\frac{1}{2}$	$\frac{3}{2}$	$2\frac{5}{2}$

4. Convert $\frac{14}{4}$ to a mixed number.		
$3\frac{10}{4}$	$\frac{10}{4}$	$3\frac{2}{4}$
