

# PLANTS

They contain \_\_\_\_\_, a green substance which is necessary for photosynthesis. Most of them have two parts:

- \_\_\_\_\_
- \_\_\_\_\_

\_\_\_\_\_ It holds up the other parts of the plant. It also transports materials to the leaves for photosynthesis. The food produced through photosynthesis then travels to the other parts of the plant.

\_\_\_\_\_ They hold the plant in the ground. They absorb water and minerals needed for nutrition from the ground through the \_\_\_\_\_

roots

stem

chlorophyll

petiole

blade

Root hairs
