

SPACE EXPLORATION

When Una was a baby her first step was one giant leap. This is a reference to Neil Armstrong's first step onto the moon on July 20, 1969. He uttered the famous phrase "That is one small step for a man but 1 giant leap for mankind". What does this mean?

What other amazing feats of engineering, science, technology, exploration and development has mankind made since that moon landing in 1969. List at least 10 of these below:

Choose one of these advancements and answer the following questions:

When did this happen?

Where did this happen?

Who was instrumental in making it happen?

How did it change mankind and was it for the better or worse?
