Solve each word problem.

The pizza had 4 slices.

Michael ate  $\frac{\text{one}}{1}$  of the pizza. Ethan ate  $\frac{\text{four}}{4}$  of the pizza

$\frac{\text{six}}{6}$   $\frac{\text{six}}{6}$

How much pizza did they eat altogether?

$$\frac{\square}{\text{six } 6} + \frac{\square}{\square} = \frac{\square}{\square}$$

The pizza had 6 slices.

Michael ate  $\frac{\text{two}}{2}$  of the pizza. Ethan ate  $\frac{\text{four}}{4}$  of the pizza

$\frac{\text{eight}}{8}$   $\frac{\text{eight}}{8}$

$$\frac{\square}{\text{eight } 8} + \frac{\square}{\square} = \frac{\square}{\square}$$
