

Ho saps fer...

Calcula mentalment:

$37 \times 4 = \underline{\hspace{2cm}}$

$48 \times 5 = \underline{\hspace{2cm}}$

$37 \times 6 = \underline{\hspace{2cm}}$

$18 \times 7 = \underline{\hspace{2cm}}$

$23 \times 3 = \underline{\hspace{2cm}}$

$52 \times 4 = \underline{\hspace{2cm}}$

$29 \times 4 = \underline{\hspace{2cm}}$

$42 \times 7 = \underline{\hspace{2cm}}$

$38 \times 4 = \underline{\hspace{2cm}}$

$81 \times 6 = \underline{\hspace{2cm}}$

$46 \times 9 = \underline{\hspace{2cm}}$

$54 \times 7 = \underline{\hspace{2cm}}$

$81 \times 7 = \underline{\hspace{2cm}}$

$39 \times 5 = \underline{\hspace{2cm}}$

$73 \times 6 = \underline{\hspace{2cm}}$

$64 \times 8 = \underline{\hspace{2cm}}$

Completa i escriu els operadors oposats:

$$\begin{array}{c} 15 \rightarrow +5 \rightarrow \square \\ \leftarrow \square \leftarrow \end{array}$$

$$\begin{array}{c} 13 \rightarrow -8 \rightarrow \square \\ \leftarrow \square \leftarrow \end{array}$$

$$\begin{array}{c} 22 \rightarrow -10 \rightarrow \square \\ \leftarrow \square \leftarrow \end{array}$$

$$\begin{array}{c} 19 \rightarrow +6 \rightarrow \square \\ \leftarrow \square \leftarrow \end{array}$$

Troba el resultat de les operacions següents:

$(100 : 2) - 40 = \underline{\hspace{2cm}}$

$(80 : 4) + 2 = \underline{\hspace{2cm}}$

$(60 : 3) - 5 = \underline{\hspace{2cm}}$

$66 : (6 + 5) = \underline{\hspace{2cm}}$

$80 : (5 + 3) = \underline{\hspace{2cm}}$

$60 : (5 - 3) = \underline{\hspace{2cm}}$
