

Time zones

TASK 1:

Mark the following statements with a T (True) or F (False). ...

- | | | |
|--|----------------------------------|----------------------------------|
| 1 All clocks are set against a specific UTC standard. | <input type="button" value="T"/> | <input type="button" value="F"/> |
| 2 UTC is nearly infallible. | <input type="button" value="T"/> | <input type="button" value="F"/> |
| 3 At 12 noon in Ireland and Iceland, the sun is directly overhead. | <input type="button" value="T"/> | <input type="button" value="F"/> |
| 4 Sir Sandford Fleming was the first to divide our planet into time zones as far back as 1878. | <input type="button" value="T"/> | <input type="button" value="F"/> |
| 5 Fleming divided the 360 degrees of the Earth's longitude into 15 sections. | <input type="button" value="T"/> | <input type="button" value="F"/> |
| 6 UTC+1 is located 15 degrees west of UTC. | <input type="button" value="T"/> | <input type="button" value="F"/> |
| 7 The time in New Zealand will be UTC+1 if it is midday on the prime meridian. | <input type="button" value="T"/> | <input type="button" value="F"/> |

TASK 2: Write 3 things you have learnt about time zones
