NAME: _____ **List No.**_____

1. Name the three parts of the circulatory system. ____/3

_____ _____ _____

2. Match the terms and their definitions. ____/3

Capillaries •	• They carry blood **from the rest** of the body to the heart.
Arteries •	• They transport the blood **around the body**.
Veins •	• They carry blood **from the heart** to the rest of the body.

3. Circle the correct term to complete the text. __/6

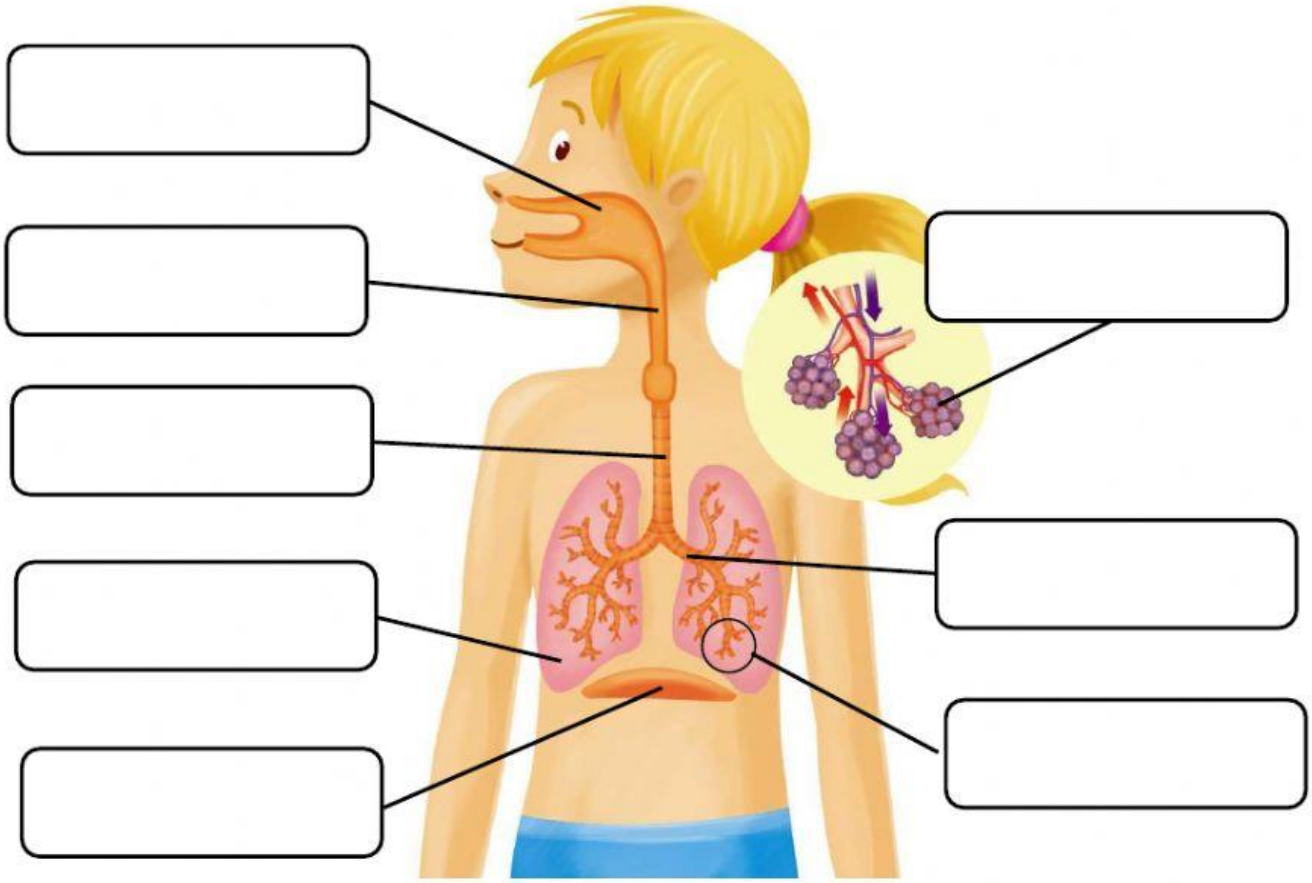

The heart never stops, this movement is called a **heartbeat/circulation**.

There are two types of movement:

- When the heart **contracts / relaxes**, it fills with blood received from the veins.
- When the **contracts / relaxes**, it pushes the blood into the arteries. They carry the blood to the rest of the body.
