

1 Read and answer.

Read the two e-mails below and answer the questions.

Drag the answers and drop them under the correct questions

Maha

turtles

Ras Al Hadd

Nina

1 Who is the sender of the first e-mail?

3 Who is the sender of the second e-mail?

2 What animal does she want information about?

4 What place in Oman does she write about?

To: maha@ikc.com

From: nina@ikc.com

Subject: Turtles project

Dear Maha,

I'm doing a project at school about turtles. My teacher told me that Oman is very famous for turtles. Please can you tell me about where they live and how they grow?

Thanks and best wishes

Nina

Subject: Turtles project

Dear Nina,

Thanks for your e-mail. Yes, there are lots of turtles in Oman. There's a place called Ras Al Hadd where people go to see them.

I've found some pictures about how turtles are born, and I've written some information for you. I hope this helps you with your project.

Bye

Maha

2 Read and write.

Read the e-mails in Activity 1 again.

Write short answers to the questions below into your exercise book.

Example: 1 Is Nina doing a school project? Yes, she is.

Draw a line between the questions and answers

2 Is her project about birds?

Yes, it is.

3 Is Oman famous for turtles?

No, it isn't.

4 Does Nina live in Oman?

Yes. She is.

5 Can Maha help Nina?

No, she isn't.

1 Read, match and write.

- A Match each picture to a text.
Write its number beside the text.
- B Complete each sentence with one
of the words in the turtles.

After

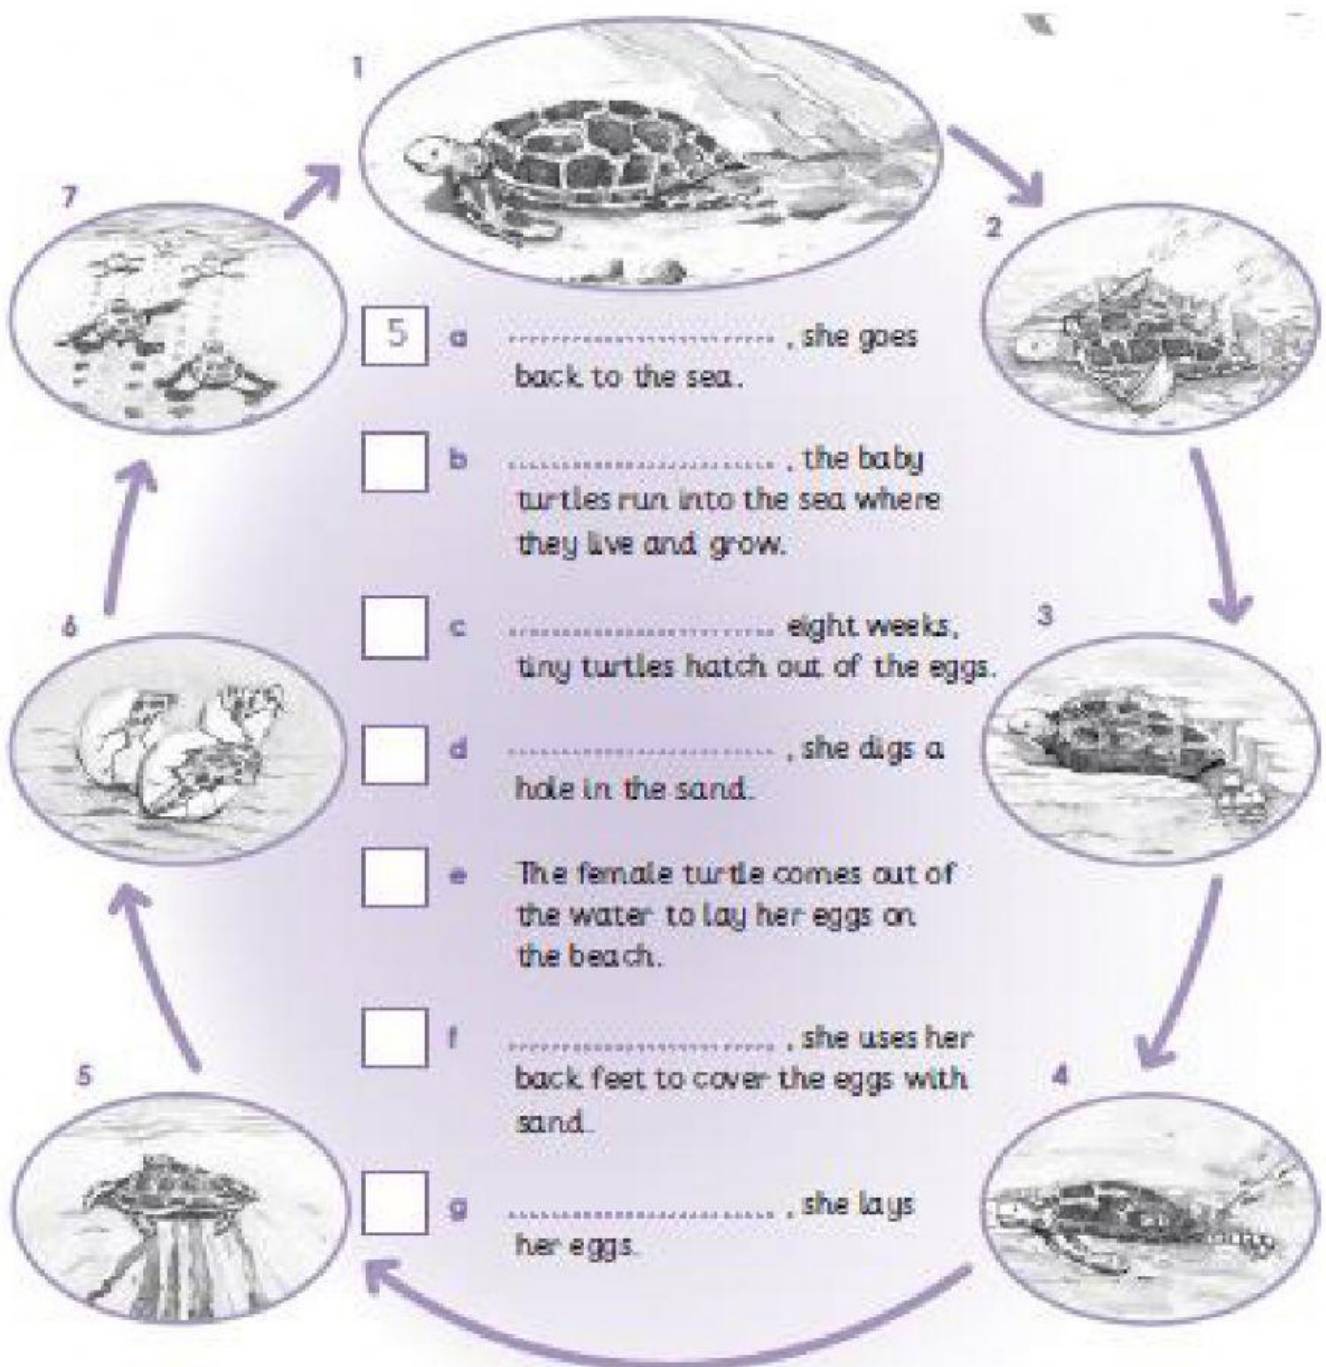

Then

Next

Then

First

Finally

2 Read, find and write.

Complete each gap in the text with one of the words from the box.

hole days ~~eggs~~ grows butterfly fly leaf changes

The Life Cycle of a Butterfly

First, a female butterfly lays her (1) eggs under a (2) leaf. After about 10 (3) days, a caterpillar makes a (4) hole in the egg and comes out. Next, the caterpillar eats and eats until it is fully grown. Then it (5) changes into a chrysalis and the butterfly (6) grows inside. Finally, the (7) butterfly comes out of the chrysalis and can (8) fly away to lay eggs of her own.
