CAUSE OF EXTINCTION OF ANIMALS

Introduction of exotic species.		It happens when humans end with the resources of a place faster than they reproduce..
Hunting / poaching.		When an animal is introduced in a different environment it can harm the rest of the species.
Pollution		When we destroy the natural home of animals and its environment.
Over exploitation.		The temperature of the planet rises and creates lot of problems like, ice melting or water heat.
Deforestation/ habitat loss.		The gasses spread to the atmosphere and human waste damage the whole planet.
Global warming.		Some human hunt animals to get their bones, leather or meat.
