

HOW TO budget

Step 1: The worksheet is interactive. **Write the numbers from the text in the correct place in the table.** You only need to write numbers.

Step 2: **Send the worksheet** to my email.

Step 3: **See your mark** on your screen.

Sarah is very lucky. She receives 10€ from her parents for helping around the house each week. She also receives 5€ for helping her little brother do his English homework. Sarah is very good at English. Sarah likes to spend 6€ every week on apps for her tablet. Then, she spends 4€ on snacks. This week, she also received 3€ from her Grandfather for helping him in the garden. She bought a new t-shirt in Lefties for 5€.

Read the text and complete Sarah's budget. Decide:

- what is **income** (money received)
- what are **expenses** (money used)
- calculate the **balance**. Subtract (restar) expenses from income to make the balance.

A healthy budget should always have more income than expenses

income	expenses	balance
€		€
€		€
	€	€
	€	€
€		€
	€	€
+18 €	- 15 €	= 3 €
