Adding Fractions with like denominators

Grade 4 Word Problem Worksheet

Read carefully, draw physical representations if necessary, then solve each problem.

1. On Friday Jim picked 12 mangoes from his tree. He gave his neighbour 4/12 and gave his friend Timmy 3/12. What is the total amount of mangoes that were given away?

2. Mommy baked 8 cakes for Christmas. She gave Aunt Lisa 3/8 and gave Grandma 2/8. What is the total amount of cakes that mommy gave away?

3. During the strong rain yesterday, 11 breadfruits fell off the tree. Daddy found 4/11 of them, then he found another 6/11. What is the total amount of breadfruits that were found?

Challenge:

`Create a word problem of your own similar to the problems above which involves the adding together of two fractions with denominators of 8.
