

School Subjects

"I think history is the best subject at school. I love reading about the past and looking at pictures of the past. I think it is easier to remember something when you've seen a picture. I think history is easier than geography and it's more interesting."
- Hassan

"We learned a song in our English class last week. It was really cool. I can remember all the words to the song. Songs are easier to remember than lists. I love English."
- Aisha

"My favorite subject is science. I like maths, too, but I think it's harder than science. I think science is more interesting. I like doing experiments. We did one in class last week. It was brilliant. Experiments aren't as difficult as essays. They are fun and it's easier to remember facts when you do an experiment." - Rashid

2 Read the notes and match to the speakers from Activity 1 in the Coursebook.

Who...

likes looking at pictures
learned a song
enjoys quizzes
likes history
likes reading about the past

loves English
thinks maths is harder than science
likes doing experiments
thinks songs are easier than lists
