Transformar una fracción impropia a número mixto

Divisor $\times$ cociente $+$ residuo

$$\frac{11}{4} = 4 \times 2 + 3 = 2 \frac{3}{4}$$

$$\frac{8}{3} = \quad \times \quad + \quad = \quad -$$

$$\frac{13}{5} = \quad \times \quad + \quad = \quad -$$

$$\frac{13}{2} = \quad \times \quad + \quad = \quad -$$

$$\frac{15}{4} = \quad \times \quad + \quad = \quad -$$

$$\frac{23}{5} = \quad \times \quad + \quad = \quad -$$

$$\frac{33}{7} = x + = -$$

$$\frac{23}{4} = x + = -$$

$$\frac{43}{8} = x + = -$$

$$\frac{23}{9} = x + = -$$

$$\frac{53}{7} = x + = -$$
