Name:

Mathematics Factors and Multiples

Pay VERY CLOSE attention to the examples!!

Example 1. Factors of 6 = (1, 2, 3, 6)

Example 2. First 5 <u>multiples</u> of 6 = (6, 12, 18, 24, 30)

1) List the first 5 multiples of	of 3. (,	,	,	,)					
2) List the first 5 multiples of	of 7. (,	,	,	,)					
3) List the multiples of 2 bet	ween 7	and	19.	. (,	,	,	,	,)	
4) List the multiples of 6 fro	m 18 to	48.	(,	,	,	,	,)		
5) The numbers (10, 20, 30, 40, 50, 60) are multiples of											
6) The numbers (4, 8, 12, 16, 20, 24, 28) are multiples of											
7) Which of these numbers (2, 3, 4, 8, 12, 16, 20, 24) are not multiples of 4?											
8) Which of these numbers (21, 55, 66, 70, 77, 88) are not multiples of 11?											
9) Which of these numbers (24, 28, 30, 32, 34, 36) are multiples of 6?
