

Allen's Bottles CER

Allen wants to add to his existing collection of 300 bottles. Starting today, he will collect 25 bottles each week

- a. What will be the **total** number of bottles in Allen's collection after 4 weeks?

CLAIM

A statement of conclusion that answers the original problem

EVIDENCE

Mathematical data that supports the claim

REASONING

A justification that connects the evidence to the claim

Final Sentence:

- b. Write an expression to represent the total number of bottles in Allen's collection after w weeks.

Allen's Bottles CER

c. After how many weeks will Allen have a total of exactly 1,000 bottles in his collection?

CLAIM

A statement of conclusion that answers the original problem

EVIDENCE

Mathematical data that supports the claim

REASONING

A justification that connects the evidence to the claim

Final Sentence:

Allen's goal is to have between 1,500 and 1,600 bottles in his collection.

d. Write and solve a compound inequality to determine the number of weeks it will take Allen to reach his goal.
