

Nom: \_\_\_\_\_ Data: \_\_\_\_\_

# 1-Suma i resta de fraccions amb el denominador igual

Se sumen o es resten els numeradors i es deixa el mateix denominador

$$\frac{3}{5} + \frac{1}{5} = \frac{4}{5}$$

$$\frac{5}{6} - \frac{4}{6} = \frac{1}{6}$$

1 Observa les figures i efectua les sumes

$$\frac{1}{6} + \frac{3}{6} = \underline{\hspace{2cm}}$$

$$\frac{4}{9} + \frac{3}{9} = \underline{\hspace{2cm}}$$

$$\frac{3}{8} + \frac{2}{8} = \underline{\hspace{2cm}}$$

$$\frac{4}{9} + \frac{2}{9} = \underline{\hspace{2cm}}$$

4 calcula:

$$\frac{3}{10} + \frac{1}{10} + \frac{3}{10} = \underline{\hspace{2cm}}$$

$$\frac{5}{14} + \frac{7}{14} + \frac{1}{14} = \underline{\hspace{2cm}}$$

5 Multiplicar un nombre natural per una fracció equival a sumar fraccions iguals. Fixa't en l'exemple i calcula

$$3 \times \frac{1}{4} = \frac{1}{4} + \frac{1}{4} + \frac{1}{4} = \frac{3}{4}$$

$$4 \times \frac{3}{7} = \underline{\hspace{2cm}}$$

$$3 \times \frac{4}{5} = \underline{\hspace{2cm}}$$

$$5 \times \frac{2}{3} = \underline{\hspace{2cm}}$$

$$2 \times \frac{7}{8} = \underline{\hspace{2cm}}$$

7 Calcula-ho al quadern:

$$\frac{7}{9} - \frac{5}{9} = \underline{\hspace{2cm}}$$

$$\frac{9}{10} - \frac{7}{10} = \underline{\hspace{2cm}}$$

$$\frac{4}{7} - \frac{2}{7} = \underline{\hspace{2cm}}$$
