

1. Living things are those things that perform **three vital functions**. Do you remember those **three vital functions**? Write their names after the correct definition.

- If the environment changes they react with a response.  
\_\_\_\_\_
- Living things produce new organisms similar to them. It can be sexual or asexual. \_\_\_\_\_
- All living things obtain nutrients from their environment and transform them into energy. \_\_\_\_\_

2. Depending on the number of cells, we can classify living things into two different groups:

- \_\_\_\_\_ **organisms** are living things made up of many different cells.
- \_\_\_\_\_ **organisms** are living things made up of a single cell.

3. Translate the following words into Spanish.

Kingdoms:

Fungi:

Living things:

Feed:
