Match the words and its definitions

- | | | |
|----------|--------------------------|--------------------------------------|
| GLIDE | ☐ | A. Empty |
| SOAR | ☐ | B. The movement of wings up and down |
| FLAP | ☐ | C. Fly upward |
| WINGSPAN | ☐ | D. Distance between wing tips |
| HOLLOW | ☐ | E. Float in the air |
| EVOLVE | ☐ | F. Develop and improve over time |

Read and write the words from the list. Make any necessary changes

glide	evolve	capability	flight	adaptation
-------	--------	------------	--------	------------

As an evolutionary biologist and paleontologist, Ryan Carney studies the history of dinosaurs and their modern-day descendants—birds. From a single feather, he was inspired to research the that species made over time in order to fly. He is interested in *Archaeopteryx* because it was the earliest known dinosaur. *Archaeopteryx* was also the earliest species to.....the.....of powered flight. Ryan investigates whether.....in birds originated from “the ground up” (from ancestors that first ran on the ground), and not from “the trees down” (from ancestors who lived in trees and then learned to.....before eventually flying.
