

1.- MYRIAPODS: Label this picture with some parts of the body of this scolopendra:

2.- MYRIAPODS: Look information on your notes, and complete or choose True / False.

- |  |       |
|--|-------|
| a.- They are aquatic invertebrates.                            | T / F |
| b.- Myriapods breathe through tracheas                         | T / F |
| c.- Scolopendra have a segmented body, with 2 legs per segment | T / F |
| d.- They have got twelve legs.                                 | T / F |
| e.- Millipedes have got 4 legs per segment.                    | T / F |
| f.- Centipedes are carnivorous, and they have two venom claws. | T / F |
| g.- Millipedes have between 36 and 400 legs.                   | T / F |
| h.- Myriapods have three antennae, and two eyes.               | T / F |

3.- Fill this chart about arthropods.

ARTHROPODS	Antennae	Legs	Examples of animals	Parts of the body	Characteristics: .- Jointed legs .- Exoskeleton made of chitin
A.- INSECTS (Terrestrial or aquatic)					
B.- ARACHNIDS (Terrestrial)					
C.-CRUSTACEANS (Mostly aquatic)					
Terrestrial					
D.- MYRIAPODS (Terrestrial)
