My Dream House

My name is Graham. I like designing things. Last year I designed my dream house. It is at the top of a big hill. My house is very unusual. It is in the shape of a pyramid. The doors are made of paper and the windows are made of wool. The floors are made of metal and the bed is made of gold. The chairs and the tables are made of silver. The shelves are made of plastic.

People tell me that it is impossible for me to build my dream house. They say that real houses are made from different materials. Doors, tables, beds and chairs are made of wood. Windows are made of glass and shelves are made of wood. They say that houses are not usually in the shape of a pyramid. Maybe people are right. But I don't mind. I don't really want to live in my dream house. I just want to think about living there.

- 1 What shape is Graham's dream house?

Graham's dream house is

- 2 What are the doors in the dream house made of?

.....

- 3 What are the windows in the dream house made of?

.....

- 4 Where is the dream house?

.....

- 5 What are doors in real houses made of?

.....
